Monthly fraud trends · September 2026

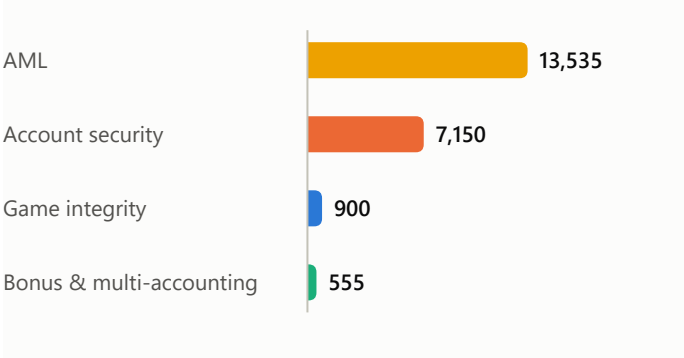

Demo crypto poker room · synthetic data · cases opened in September vs. July and August · generated 23 Oct 2026

New cases	Accounts involved	Money at risk	P1 cases (review today)
7	22	22,139 USDT	2
▲ 3 vs August	▲ 13 vs August	▲ 8,132 USDT vs August	▲ 1 vs August

New cases per month by type

Money at risk in September's new cases, by type (USDT)

What changed in September

- **Account takeover: 4 flags (vs 1 in August).** 3 were one campaign: the same device, IP and payout wallet on consecutive nights, 6,510 USDT withdrawn, all from hosting (server/VPN) IPs. 1 other flag looks like a traveller's new phone (the 'new' device was later used from home): probably a false positive, to confirm with the player.
- **Bonus abuse: a farm of 12 linked accounts (largest before: 5 in July).** Opened within 6 days, all with disposable emails; each took the welcome bonus and they cashed out 555 USDT. Small money, but the pattern is scaling.
- **AML: 2 new accounts moved 5,800 USDT through with almost no play.** They shared a payout wallet, and all switched from BTC/ETH to USDT on the way. Separately, P01879 made 4 deposits just under the 2,000 USDT review threshold in a week (structuring). All of these go to the MLRO; the players are not told why.
- **Game integrity:** 1 new chip dumping case (900 USDT); still active from earlier months: the August chip dumping group (5 accounts, until 3 Sep), the July collusion group (3 accounts, until 28 Sep), the August collusion group (2 accounts, until 29 Sep).

Rings and campaigns active in September

Case	Type	Accounts	Active	Money at risk	Priority
FR-2608-02	Chip dumping + Multi-accounting	5	08-10 → 09-03	7,090 USDT	P1
FR-2609-07	Account takeover	3	09-21 → 09-23	6,510 USDT	P1
FR-2607-02	Collusion / soft-play + Multi-accounting	3	07-05 → 09-28	1,200 USDT	P1
FR-2609-02	Bonus abuse + Multi-accounting	12	09-03 → 09-12	555 USDT	P2

Recommended actions

- **Step-up check on new-wallet withdrawals.** Ask for 2FA or email confirmation when a withdrawal goes to a never-used wallet within 24 h of a login from a new device and country. It would have challenged every takeover withdrawal this month; the cost is one extra step for travellers.
- **Make the welcome bonus slower to cash out:** hold it for 7 days or 100 hands, and refuse it to devices and wallets already linked to a claimed bonus.
- **Send this month's AML cases to the MLRO** and screen the shared payout wallet with blockchain analytics; hold large deposits that are withdrawn almost unplayed for manual review.
- **Alert in real time when linked accounts open a two-seat table together:** 100% of the hands between flagged chip-dumping pairs this quarter were played at one.

Rule health

7 rules, 16 cases this quarter; 3 shared identifiers ignored as too common to identify anyone (carrier gateway, VPN exit, exchange wallet). Against the planted answer key: 14/14 fraud scenarios caught, 7/7 innocent look-alikes left alone. Known false-positive pattern: 2 takeover flags where the 'new' device was later used from home (a traveller's new phone) - which is why every flag goes to a human.
